About me

As a recent graduate entering the realm of full-stack development, I approach the tech world with a blend of curiosity and determination. Equipped with foundational knowledge in both front-end and back-end skills, I'm eager to apply these skills to practical projects. Embracing challenges as stepping stones for advancement, I aspire to engage in collaborative endeavors, contributing fresh perspectives while evolving in the dynamic sphere of web development. My proactive approach and passion for learning drive me to constantly seek challenges that broaden my experience and contribute to growth in this exciting industry.

DEVELOPMENT PROJECTS

- DIC-23** **Gnomes-War** REPO | WEB
Crafted a web-based rock-paper-scissors game with emojis representing natural elements. Implemented game logic and visual design using JavaScript and CSS.
- NOV-23** **Whack-a-Mario** REPO | WEB
Created a web-based Whack-a-Mole-style game with a Mario Bros theme. Implemented complex game mechanics and visual design using CSS and JavaScript.
- HANGMAN** REPO | WEB
Developed a single and multiplayer hangman game. Implemented complex game logic, network integration for multiplayer mode, and asset management using React working in a pair programming.
- OCT-23** **Owen-Wilson-Wow** REPO | WEB
Web tool using React to search movies featuring actor Owen Wilson's "Wow" moments, integrated with an external movie database API.
- SeriesFavoritas** REPO | WEB
Created a web platform for managing favorite TV series. Implemented search features and data storage using JavaScript and API integration.
- Awesome-Cards** REPO | WEB
Developed a web-based card platform focusing on design and interactivity using SCSS and JavaScript.
